

Electricity: from energy to cost - Worksheet

Electricity: from energy to cost — Grades 4–6

All money is pretend. Show your thinking with words, pictures or numbers.

1. At the invented rate of \$0.20 per kWh, what does 10 kWh cost before fixed fees?

\$0.20 / \$2.00 / \$20.00

My thinking: _____

2. Usage falls from 10 to 6 kWh. With the same rate and \$5 fixed fee, what is saved?

\$5.00 / \$1.20 / \$0.80

My thinking: _____
