

Dino's light detectives - Plan

Dino's light detectives — Grades 1–3

Duration: 20 minutes (adjust as needed)

Learning goal: Notice unnecessary electricity use and compare pretend costs.

Materials: Paper room pictures and ten paper tokens.

1. Welcome / 3 minutes: Preview the goal and invite learners to watch, point, talk, use AAC or work on paper.
2. Model / 5 minutes: Sort pictures: empty room, reading room and a room with a needed safety light. Ask an adult before changing lights. Model pretend lighting costs of \$5 before and \$3 after. These are invented numbers, not a real bill estimate.
3. Practise / 8 minutes: Explore the 2 worksheet questions together or independently. Allow extra time or skipping.
4. Reflect / 4 minutes: Ask learners to show one money choice and how they worked it out. Sharing is optional.

Adaptation: Keep lighting needed for seeing, comfort and access. Children do not touch plugs, bulbs or appliances.
